## GUIDE AND INVENTORY TO THE PEOPLE FILE

This is a name file relating to current and former members of the Department both civilian and sworn.. It includes photographs, negatives, newspaper clippings, correspondence, etc. related to the named individual. A few individuals are included in the People File when they have been associated with the Department in one way or another such as: Presidents, Governors, Mayors, sports figures and actors. Material, usually newspaper clippings, regarding criminals and their victims have been placed with the Subject File.

Known ranks are shown. Photos of the same individual coming up through the ranks may be present. The date, or dates shown, indicate when some of the included material was prepared. A " — " is indicated when no date can be established.

In the future, it is desired that each name will eventually include the time span that the individual worked for SPD, if he or she did, and the highest rank attained. Separate personnel listings should be consulted for more information as desired.

Many of the photographs in this collection were published in one of the SPD public relations newspapers: Main 7810, Police Journal, Call Box, Seattle Police News, and the SPD Journal, or histories. One could go through each of the issues (in the Public Information Unit File) and identify a number of the currently unidentified photos.
